PLEASE READ THIS, IT LIMITS OUR LIABILITY

Thermo Plaques are made under a heat/pressure process. No liquids, resins or varnishes are used, guaranteeing a fine lamination. Because of the heat and pressure used to laminate the sheets of plastic, embossed notarial seals flatten out and sometimes become unreadable. Tape residue, fingerprints and food-stains on the items to be laminated may become visible, some inks smudge noticeably, and "ghosting" or "bleed through" may occur from reverse printing. Although we use extreme care in handling and preparing your documents, Thermo Plaque Company, Inc. can assume no responsibility for any changes that occur during the laminating process.
